- BSc (Hons) in Software Engineering

TECHNICAL SKILLS

- HTML
- Java Script
- Tailwind
- Java
- Git
- CSS
- React
- Bootstrap
- MySql
- Github

PROFILE

As an undergraduate software engineering student at ICBT Colombo Campus, pursuing a degree from Cardiff Metropolitan University, UK, I am deeply passionate about web development and eager to leverage my skills to tackle real-world challenges. I'm on the lookout for opportunities to learn and grow further in this field.

PROJECTS

Sri Lanka Railway Ticket Booking System   Mar 2024 - Apr 2024

- This web application facilitates users to search for trains, book tickets, and manage train schedules and reservations. The system is designed for both customers and administrators.
- Technologies - **React.js, Bootstrap, Tailwind CSS, Sass, .NET, SQL Server**
- Github Repo - https://github.com/Lakna-Premachandra/Train-Ticket-Booking-App.git

My Portfolio   Updating

- I developed this portfolio website using React.js and Tailwind CSS. It provides an overview of my background, showcases my projects, and offers a way to get in touch with me.
- Technologies - **React.js, Tailwind CSS**
- Github Repo - https://github.com/Lakna-Premachandra/Portfolio.git
- Link - https://laknaportfolio-lakna-premachandras-projects.vercel.app/

Pet Care Shop App   Dec 2023 - Jan 2024

- I developed this Android application as a platform for connecting pet owners (customers) with pet caregivers. It allows customers to post caregiving requests for their pets, and caregivers can view these posts and confirm jobs. The app facilitates communication between both parties and provides features for managing profiles and feedback.
- Technologies - **Java, MySQL**
- GithubRepo -https://github.com/Lakna-Premachandra/pet_care_shop

Apple iStore
Feb 2024 - Apr 2024

- I created a versatile and user-friendly application using java swing to streamline the manage of products, stocks, users, and billing process within AppleiStore. Users can log in with their unique usernames and passwords. There are two user levels. They are cashier and manager, each with specific functions.
- Technologies - **Java , Java Swing**
- GithubRepo- https://github.com/Lakna-Premachandra/Apple-iStore.git

Explore Sri Lanka Website
Feb 2024 - Apr 2024

- Our university teak team project, the Explore Sri Lanka Tourism Website, serves as a comprehensive platform for customers, hotels, and tour guides to explore and book various tourism-related services in Sri Lanka. Additionally, an admin panel facilitates efficient management of users, tour packages, and shop items.
- Technologies - **HTML, CSS, JavaScript, PHP, MySQL**
- Github Repo - https://github.com/IshanArdithya/ExploreSriLanka.git

4u-Shop-Website
Sep 2023 - Nov 2023

- 4U Company E-Commerce Website This platform allows users to browse products, login securely, and make purchases.
- Technologies - **HTML, CSS, JavaScript, PHP, MySQL**
- Github Repo - https://github.com/Lakna-Premachandra/4u-website.git

The Outer Clove Restaurant Website
Nov 2023 - Dec 2023Nov

- The Outer Clove Restaurant's Food Ordering web application allows customers to browse through a variety of food categories, select dishes, place orders, make event reservations, and provide feedback. Additionally, administrators can manage users, food categories, dishes, orders, and view feedback.
- Technologies - **HTML, CSS, JavaScript, PHP, MySQL**
- Github Repo -
https://github.com/Lakna-Premachandra/Outer-Clove-Restaurant Website.git

Book Store Managment System
On going project

- In my ongoing project, Bookstore, users can effortlessly view and purchase books, while administrators have the capability to manage book categories, individual books, and orders. This dynamic digital platform seamlessly integrates MongoDB, Express.js, React.js, and Tailwind CSS to ensure a smooth and intuitive experience for both users and admins alike.es, dishes, orders, and view feedback.
- Technologies -**React , Tailwind , Express Js , Node Js, Mongo DB**
